Whether your account has enough money to cover a transaction is determined during our nightly processing. During our nightly processing, we take your previous end of day's balance and post credits. If there are any deposits not yet available for use or holds (such as a garnishment), these will reduce the account balance used to pay your transactions. Then we subtract any debit transactions presented during our nightly processing. The available balance shown to you during the day may not be the same amount used to pay your transactions as some transactions may not be displayed to you before nightly processing. You must immediately pay the amount of any overdraft.

We may pay overdraft transactions at our discretion based on your account history, the deposits you make and the transaction amount. We do NOT GUARANTEE we will always pay your overdraft transaction, and if we do not pay your transaction, the transaction will be declined or returned unpaid.
